## About

The Tommy Basketball token was developed on the Binance Smart Chain network. Low fee and speed on the network are the biggest factors in issuing the token in this network. Coming to the project, Tommy is a basketball-loving dog. Because of Tommy's love for basketball, he will develop a game that you can play online. In this game, you will spend pleasant moments playing basketball with Tommy. Of course, you will need "ToBa" while playing these enjoyable games. Apart from these, Tommy will have a place in your life with Rewards, Trade Computitions and Airdrop & Bounty programs.
